6. STYLE THE TOP MENU

From this…   To this…   Using CSS!

Do it one step at a time to see how the CSS works!

1.

Add a solid border 1 pixel in width to the whole list

```
body {
        font-family: sans-serif;
}
ul {
        border-style: solid;
        border-width: 1px;
}
```

2.

Add a solid red border 1 pixel in width to each of the list items

```
ul {
        border-style: solid;
        border-width: 1px;
}
ul li {
        border-style: solid;
        border-width: 1px;
        border-color: red;
}
```

3.

| Home |
| About Me |
| My Favourite Books |
| My Family |
| My Pets |
Remove the bullet points from the list (lists have bullet points by default)

```
ul li {
        border-style: solid;
        border-width: 1px;
        border-color: red;
        list-style-type: none;
}
```

4.

| Home | About Me | My Favourite Books | My Family | My Pets |

Make the list items appear alongside each other.
List items are block level elements (appear on separate lines) by default.
```
ul li {
        border-style: solid;
        border-width: 1px;
        border-color: red;
        list-style-type: none;
        display: inline;
}
```

5.

| Home | About Me | My Favourite Books | My Family | My Pets |

Put spacing of 10 pixels in width and height around the entire list.

```
ul {
        border-style: solid;
        border-width: 1px;
        padding: 10px;
}
```

6.

| Home | About Me | My Favourite Books | My Family | My Pets |

Put a margin of 10 pixels on the left and 10 pixels on the right of each list item. This leaves some space in between each list item.

```
ul li {
        border-style: solid;
        border-width: 1px;
        border-color: red;
        list-style-type: none;
        display: inline;
        margin-right: 10px;
        margin-left: 10px;
}
```

7.

*Make the border around the
entire list have rounded corners
with border-radius.
Give the whole list a black background.*

```
ul {
        border-style: solid;
        border-width: 1px;
        padding: 10px;
        border-radius: 10px;
        background-color: black;

}
```

8.

*Remove the red borders and
add white text.*

```
ul li {
        border-style: solid;
        border-width: 1px;
        border-color: red;
        list-style-type: none;
        display: inline;
        margin-right: 10px;
        margin-left: 10px; }
ul li a {
        color: white;
}
```
